

Each Morph Jackfield is shipped complete with its crimp-pin mating connector kit and a captive hex driver.

Tools

AVP Datacord Polarity Protected

- Reduce the risk of equipment damage!
- Keyed jacks and patchcords eliminate inadvertent cross-patches

*The jacks and plugs of these modules are polarized for the user's protection. However, use of patchcords other than the AVP Datacord, or any other pair transposition within the customer's equipment will circumvent this polarity protection.
