

Polarity Protected

AVP Datacord

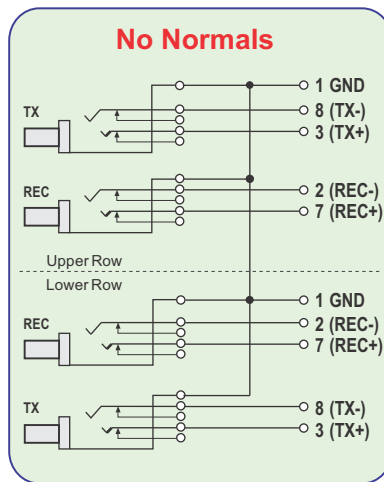

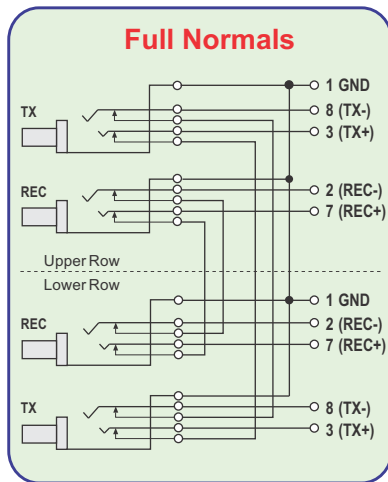

- Reduce the risk of equipment damage!
- Keyed jacks and patchcords eliminate inadvertent cross-patches

The jacks and plugs of this jackfield are polarized for the user's protection. However, use of patchcords other than the AVP Datacord, or any other pair transposition within the customer's equipment will circumvent this polarity protection.

- Datapatch Polarity Protected Bantam Patchcords: 2', [600mm] and 3', [900mm]. Please see page 56.

Polarity Protected

Datapatch Schematic

Datapatch Schematic

TX: Transmit
REC: Receive

Note 1.
Grounds are bussed unless requested otherwise.

Note 2.
The jacks and plugs of this jackfield are polarized for the user's protection. However, use of patch cords other than the AVP Datacord or any other pair transposition within the customer's equipment will circumvent this polarity protection.
