Features
and Benefits

Performance
Advantages

Bigger & Stronger
Size plus AVP's rigid mounting technique means unparalleled wire retention, no terminal push-through and overall superior strength.

Extended Cable Range
The larger diameter barrel allows termination of 20-28 gage wire, solid or stranded, and it properly terminates bulkier 110 Ohm Digital Audio Cable.

Multiple Wire Gages
The RPT terminal is certified for termination of different wire gages, **even on the same half of the terminal**. The colored arrows show the four mechanically independent slots.

Longer Life
The RPT terminal is certified for 300 punch cycles, using 22 to 26 gage wire, facilitating easy and durable re-configuration at any time.

Faster & Easier
The wire gripper locates and retains the wire before the punch enabling quick termination with just one hand.

Lifetime Tip Replacement
The AVP heavy-duty punch tip is guaranteed for life (and we're still waiting for the first claim).

AVP RPT... Globally proven system without traditional "Punch Rules"

Patent Information: see inside back cover.
